Marseille, May 21 2015

## **Onet acquires Applus RTD France, company specialized in the performance of non-destructive tests.**

**The services and engineering Onet group makes official the acquisition of Applus RTD France, a company specialized in the performance of non-destructive tests, enabling this way Onet Technologies to propose a global offer in non-destructive examinations and non-destructive tests.**

Applus RTD works within the field of conventional and advanced tests, including more especially the radiography (X, gamma, selenium, gamma spectrometry and numerical radiography).

With this purchase, Onet Technologies reinforces its activities on all the reference techniques (radiography, ultrasounds, penetrant tests, magnetic particle testing, ACFM or again Eddy currents), and now proposes a global offer in non-destructive examinations and non-destructive tests.

These new services linked to a Research&Development platform for the creation and test of the tools and advanced processes, cover the entire spectrum of the industrial needs, from the automated qualified process to the simple servicing by an entitled operator.

Finally, the operation of external growth will enable developing Onet Technologies positioning internationally and extending its local geographic coverage, especially through the development of its activity in the region of Lyon and in the PACA (Provence-Alpes-Côte d'Azur) region.

« We are delighted with this acquisition which enables us to offer global and integrated solutions. It reinforces our positioning, in France and internationally, on the nuclear, industry and Oil & Gas markets », points out Philippe Clergue, Director General of Onet Technologies.

## About Onet, group of services and engineering

Onet federates 6 brands:

**Onet Cleaning and services, Onet Logistics and Onet Airport Services**

(921 million euros in 2013)

**Onet Technologies**

(250 million euros in 2013)

**Onet Security and Onet Reception**

(196 million euros in 2013)

As well as the Human resources trade with Axxis Resources and the business of cleaning materials and products with Prodim

Global turnover in 2013: 1,416 Billion euros. 58 700 corporate members as of December 31 2013 in more than 300 agencies in France and in 7 other countries.

### About Onet Technologies

Onet Technologies is one of the French leaders of nuclear industry, both in engineering and reactors' maintenance (especially those of the primary system), but also in dismantling and treatment of radiological wastes. Today Onet Technologies has more than 2700 employees with some international companies and long-lasting partnerships.

Onet Technologies covers the entire nuclear cycle and proposes integrated and turnkey solutions within the fields of new build, nuclear services and dismantling.

Focused on the future and innovation, Onet Technologies is also an expert involved in projects such as ITER, experimental reactors and of Generation IV such as ASTRID and Jule Horowitz.
