Crédit Mutuel Arkéa chooses Onet Security for its security system maintenance needs

Onet Security continues its expansion into Brittany and southwestern France as it captures a contract with Crédit Mutuel Arkéa for security systems maintenance at the bank's corporate offices and branch locations.

Under the agreement, Onet Security will provide maintenance services at Crédit Mutuel Arkéa's 450 branch offices in Brittany and its 150 locations in southwestern France, and will hire nearly a dozen new technicians.

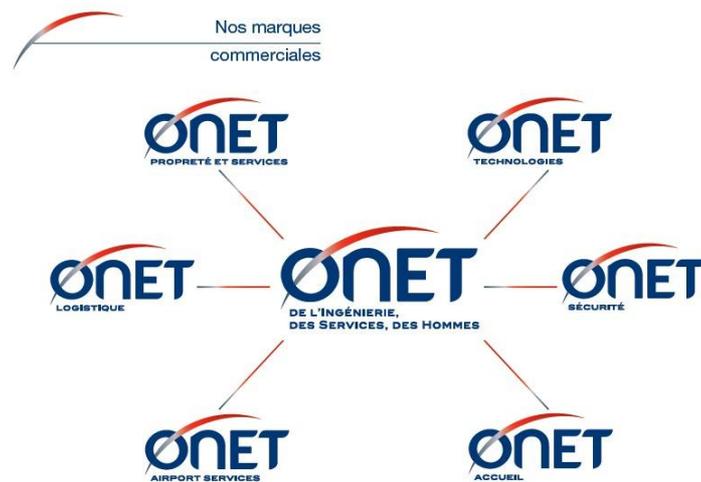

The new contract also confirms the strategic impact of Onet Security's recent acquisition of Cidel, a specialist in security and high-technology systems. The regional coverage provided by the Cidel offices in Rennes and Quimper, coupled with the existing network of Onet Security Electronics locations across France, are among the factors that contributed to this business success.
