

Creating customized logistics solutions at the heart of our customers' processes and infrastructures

Our approach

At Onet, we adapt our organisation to business processes by establishing a direct presence at our customers' sites.

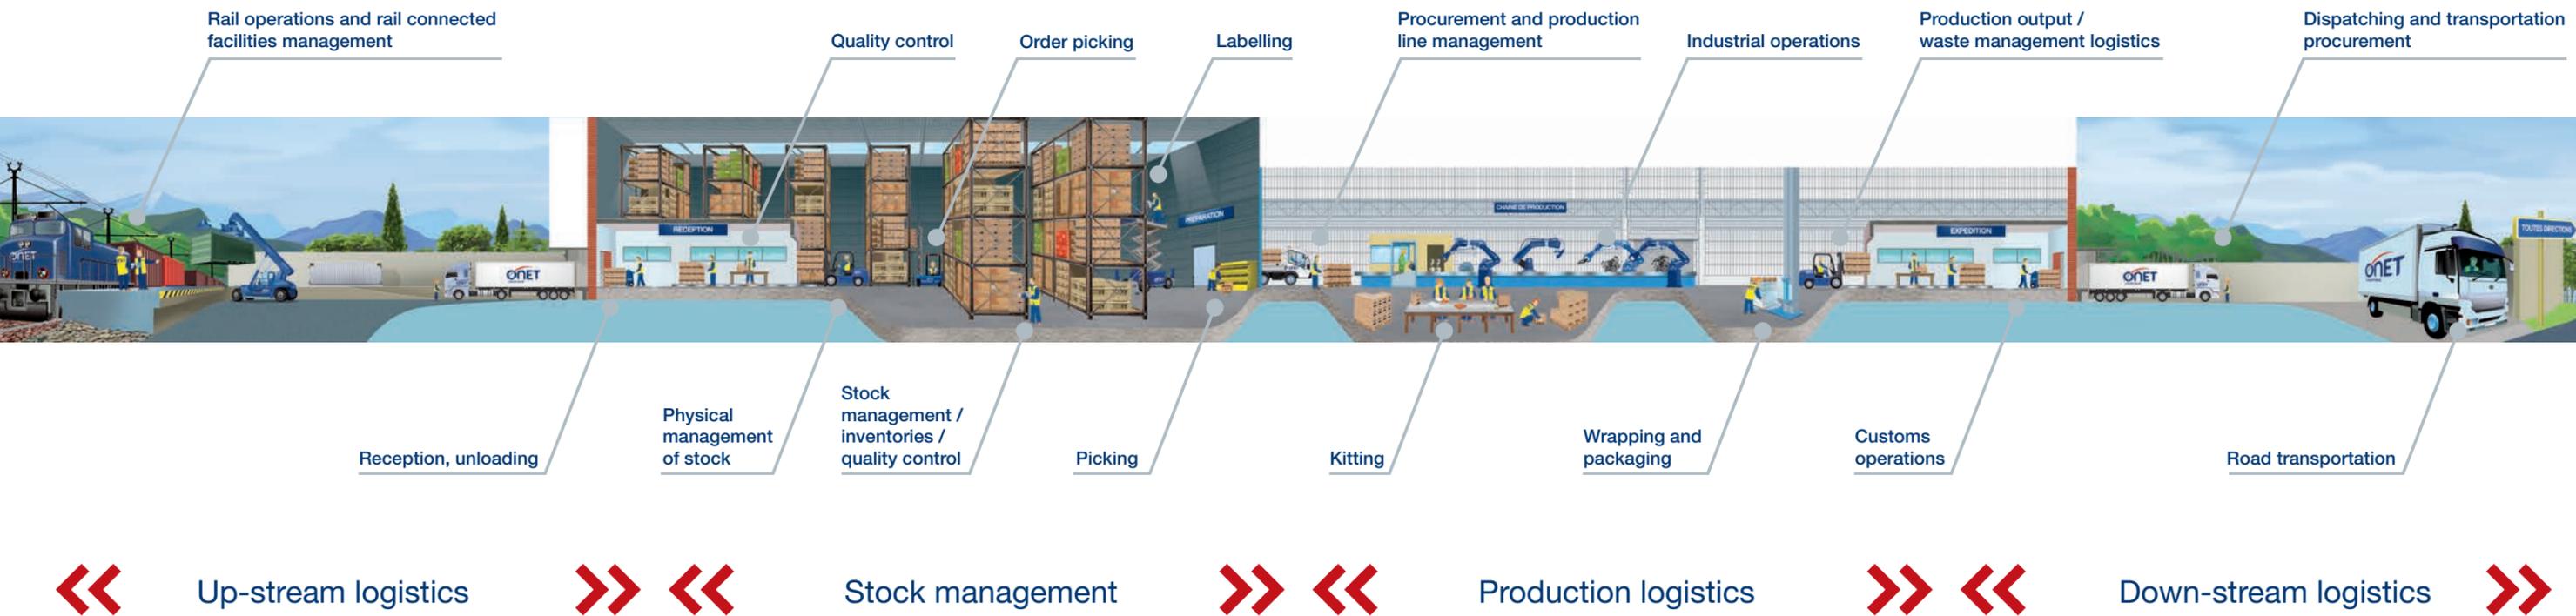

Our flexibility means that we adapt perfectly to any changes in flow. Our close relationship with our customers guarantees the secure continuity of their activities and a responsiveness ensuring optimal performance.

Our expertise and experience in sectors requiring the highest standards such as aeronautics, confirms our position: *"Creating logistics solutions at the heart of our customers' processes and infrastructures through the deployment and management of skills and resources, the driving forces behind our efficiency and agility."*

Our service offer

Our value offer is made through two core skills:

- **Consulting and logistics engineering**
 - Audits et diagnoses of logistics systems
- **Management of physical and information flows**
 - Up-stream logistics
 - Stock management
 - Production logistics
 - Down-stream logistics

Document monitoring - Steering - Traceability

Our strengths make all the difference:

- Our perfect command of business techniques (processes, methods, tools): guaranteed by our certifications in ISO 9001, ISO 14001 and HSQE [the EN 9120 certificate for the aerospace sector is currently in process].
- Our responsible management: in a sector subject to a high level of risk, the health and safety of employees is our priority.
- Our unique social initiative for staff.
- Our logistics engineering: supporting an increase in skills in our clients' value chain.
- Our reputation for reliability: our Authorised Economic Operator (AEO) status, our Known Consignor agreement and our Red Badge certification.
- Our commitment to being an "Objectif CO2" carrier.
