

“T2G” : the new touch-screen graphic display terminal by Onet Sécurité Telem

As a response to the demand to modernise security systems by integrating the newest state-of-art technologies, Onet Sécurité Telem is now introducing the T2G, a new touch-screen graphic display system to control alarm systems and safe-deposit boxes.

With its 4.3 inch graphic touch screen and intuitive interface, this new terminal is ergonomically designed to enhance the comfort of the user. It is easy to use, and its operation is rapidly grasped. It is also equipped with intrusion detection devices as well as a system to manage access to safe-deposit boxes inside banks. It includes all the latest state-of-the-art technologies available for access badges.

With this new product, Onet Sécurité Telem is pursuing its strategy to place innovation at the service of user with the objective of continually improving its response to client needs by modernising their existing systems.

“The new terminal combines technological innovation with the attributes of a product specifically designed for the client. This approach is at the very heart of Onet Sécurité Telem’s strategy to modernise its equipment and respond to the new needs of its clients”, explains Thierry Galloux, Technical Director, Onet Sécurité Telem.
