Onet continues its international development in Brazil and Switzerland

The services and engineering group Onet is continuing its international development in the cleaning sector in Switzerland and in the multi-service services sector in Brazil. Through its subsidiaries and partnerships, Onet is now present in 7 countries.

Switzerland: a new acquisition to accelerate growth

Onet Switzerland is consolidating its activities in the French-speaking part of Switzerland by acquiring equity in Hopp Facility Services PLC, a cleaning specialist in the Swiss retail sector, with 200 employees and a turnover of € 5.3 million. The teams of Onet Switzerland and Hopp Facility Services PLC have just been brought together under the same roof with the aim of preserving the skills of each company to ensure historical continuity and customer service.

"Following the strategic and industrial partnership launched in December 2015 with the Swiss start-up Batmaid.com, Onet is continuing its presence in the Swiss market with the acquisition of Hopp Facility Services PLC, demonstrating our desire to perpetuate and increase our presence", says Didier Fischer, CEO of Onet Switzerland.

Brazil: an initial implementation through a strategic partnership

Through its strategic partnership with SM21, Onet is completing its first operation in Brazil. SM21, a multi-services company whose range of services includes the technical maintenance of buildings for the prevention of fire risks, realises a turnover of 20 M €.

"This alliance is the first step in our ambitious development with the construction of a platform in Brazil covering all of Onet's businesses," explains Stéphane Dupont, Chair of SM21 and COO of Onet's international activities.

"At the end 2016, a year marked by a strong growth of its activities outside the French territory, Onet is now present in 7 countries. We are very pleased with the results, which are in line with the dynamics initiated by our strategic plan," says Denis Gasquet, Chairman of Onet's Management Board.
